

Mr. Irish Emmanuel-Paghubasan-Agpoon
The Graduate School, University of Santo Tomas
Philippines

I am a graduating student of Master of Science in Microbiology at University of Santo Tomas, Manila, Philippines. I am a recipient of the Department of Science and Technology (DOST) scholarship under the Accelerated Science and Technology Human Resource Development Program (ASTHRDP). I finished my bachelor's degree in Biology at University of the City of Manila in 2013. During my graduate studies, I worked on the isolation of mangrove yeasts and explored their potential as an alternative protein additive in fish meal. Prior to taking graduate studies, I worked as Quality Control Laboratory Analyst at a pharmaceutical company for five years. Also, I've been a part-time college instructor at the University of the City of Manila where I taught biological science courses for a year. Further, I have worked as a molecular biologist at Fe Del Mundo Medical Center for the molecular diagnosis of COVID-19 and as a volunteer microbiologist/molecular biologist at the Research Institute for Tropical Medicine during the early months of COVID-19 pandemic.
